Office Action Summary	Application No. 10/509,494	Applicant(s) KATO, KAZUTOSHI	
	Examiner Darryl J. Collins	Art Unit 2873	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claims 5 and 6 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Saux et al. Saux et al teaches a progressive power lens structured having a first refractive surface being the object side surface and a second refractive surface being an eyeball side surface (page 2, paragraph [0024]) and further having a far field, a near field and an intermediate field (page 1, paragraph [0002]) as claimed in independent claim 1. Saux et al further teaches the eyeball side refracting surface being located closest to an eyeball side (Figure 6) as claimed in independent claim 1.

Allowable Subject Matter

Claims 2, 3, 4/2 and 4/3 are allowed.

Art Unit: 2873

Claim 4/1 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. Although the prior art teaches progressive power lenses having two refractive surfaces and comprising a distance portion, a near portion and an intermediate portion, the prior art fails to teach a progressive lens encompassing all of the claimed limitations including the structure as defined in independent claims 2 and 3.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Loosman et al, Yamaguchi, Menezes, Kitani, Kitani et al and Le Saux et al all teach progressive lenses.
